

PNEUMATIC DIVERSION VALVE

DRAMATICALLY INCREASES SAFETY, EFFICIENCY AND PRODUCTIVITY with remote line switching.

THE CHALLENGE:

Increase productivity by having the ability to safely and quickly switch lines.

THE SOLUTION:

PNEUMATIC DIVERSION VALVE

- Significant increase in safety due to reduced exposure hours
- Rugged design holds up to the most demanding mining applications
- Decrease in line changes leads to reduced downtime and increased productivity
- Valve design and construction allows for easy change, even under pressure
- Can be fit for 5", 6", or 8" lines and equipped with a variety of standard and custom end styles
- Remotely switch lines in as little as 30 seconds
