

LOW PROFILE DIVERSION VALVE

INCREASES SYSTEM EFFICIENCY & SAFETY

with reduced downtime and rigid, low profile design.

THE CHALLENGE:

Safely eliminate exposure hours and downtime caused by frequent manual line changes.

THE SOLUTION:

LOW PROFILE DIVERSION VALVE

- Significant increase in safety due to reduced exposure hours
- Decrease in line changes leads to reduced downtime and increased productivity
- Ultra Tech's swivel coupling allows full rotation of s-tube without loosening coupling
- Rigid frame reduces the issues caused by ground and pipe movement
